

Association pour le LAP

REPORT OCTOBER / DECEMBER 2020

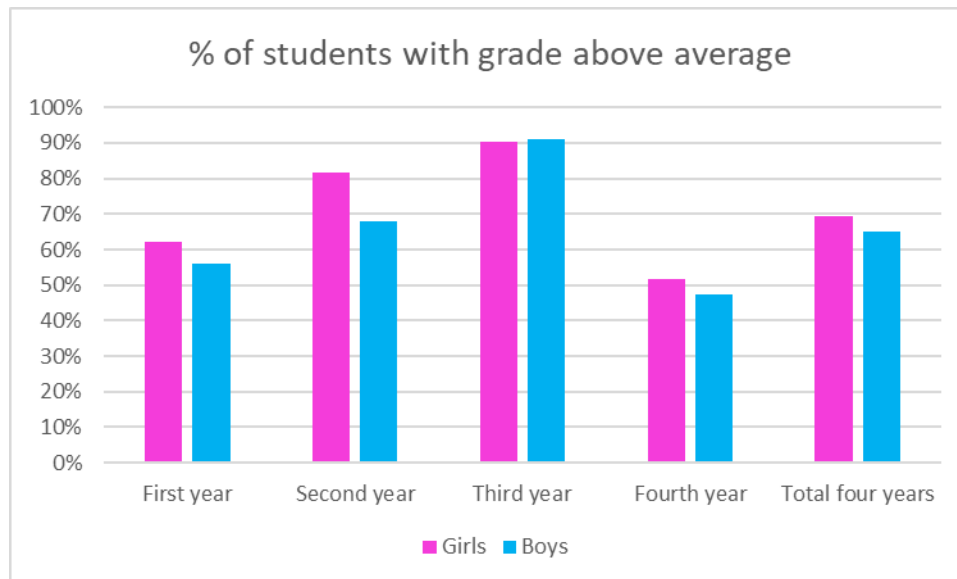

a. Personnel:

As of the beginning of January, 3 new permanent employees have been added. One to support agricultural activities (including tractor and other agricultural machinery activities) and two technicians who will take care of all electrical and mechanical maintenance at the LAP.

There are now 22 permanent employees at the LAP.

b. Students

There are 280 students at the end of the first quarter. two boys decided not to come back to the LAP: one went to a school near his village the other went to look for gold.

Those results are in line with expectation.

We can also see that girls are outperforming the boys which is unusual.

The 5 refugees students are performing in the top of the class.

c. Pictures of gardens and animals:

Zuchini

Beans

Cabbage

Association pour le LAP

Piglets

d. Funding structural costs:

Nothing special to mentioned at this point regarding the structural cost funding.

e. Funding infrastructure:

We have been able to equip all dormitory of the LAP with solar energy.

Boys in dormitory

Association pour le LAP

Boys and girls helping to install the solar energy on dormitory

One of the two water wells we have connected to the water towers was found with major problems. We had to drill a new well in December.

We have been able to install 2 of the 3 machines needed for the production of animal feeds. We expect that the 3rd machine will be installed during January 2021.

Grinder mixer

Straw grinder

We are still looking for funds for the following Infrastructure new projects:

- funds to equip the computer room with solar panels so that we can use it without having to start the generator (8.000 euro)
- funds to have a satellite connection for internet at the LAP (900 euro / trimester)
- funds to equip the refectories (girls and boys) with solar panel and TV 55" (2.300 euro per refectory)
- funds to equip the pedagogic bloc 2 with solar energy and TV for the teacher room (3.275 euro)

Week end activity: drawing
